

MIXING HOPPER

MUD MIXING HOPPER

The NatDrill venturi hopper is an ideal unit for efficiently mixing your drilling fluids and makes shearing bentonite and other additives a simple procedure that is a must for any drilling operation.

FEATURES

- Two bolt mount – fitted to the side of any mud mixing tank
- 2" male camlock fitting to suit most applications
- 45° outlet – another point of shear and to direct fluid down into the mixing tank
- Sack holder to support bagged product
- Powder coated finish
- Venturi design minimizes blockages – requirements: >220 LPM @ >30 PSI
- 3" size also available
